

Step forward with encapsia

Introducing Clinical Trials in 3D:

- *Decentralized*
- *Data Science*
- *Digital Transformation*

The holistic eClinical platform for your trials

Encapsia is a powerful tool that delivers a complete eClinical solution to gather and manage clinical trial data and give true, live insights on trial progress that inform and enhance management decisions.

More than just an EDC, our innovative, powerful and holistic platform is revolutionizing the clinical landscape in real time.

Instant data, anywhere

With multiple data capture options (EDC, eSource and HomeVisit), encapsia operates in a live, cloud-hosted, single data repository. This enables all your teams to interact with live, data, wherever they are, increasing efficiencies, reducing the burden on the patient and improving the value of investigator-patient relationships.

Actionable insights

With live data visibility at your fingertips, encapsia empowers you to make faster, better informed decisions.

Seamless integration

Integration between your various platforms is seamless, as is connecting to other vendors, via encapsia's REST API architecture.

Flexibility and speed

Flexibility is built-in and our technology is future-proof: built to leverage the cloud and boasting unrivalled speed of development.

Cost savings

For you, encapsia also means no downtime, cleaner data immediately on data entry, and enhanced speed and cost-savings.

This industry-leading software, along with complete, first class support from our project management and technical consulting teams, is available to all.

How does encapsia work?

EDC

- Adaptable configuration for complex trials
- Advanced edit checks
- Modern and powerful user experience

eSource

- Removes data transcription
- At site or in patient's homes.
- Designed for sites

Insights and Analytics

- Real-time data visualizations
- Interactive and customizable
- Actionable insights

CDMS and Monitoring

- Full query management
- Configurable and dynamic review
- Issue tracking
- Medical Coding

Third party data

- Large data loads
- Automated data reconciliation
- Supported review

Powerful integrations

- Designed for integrations
- Standard and hyper integrations
- Examples: eConsent, ePRO, RTSM, CTMS

Accelerate your clinical innovation and digital transformation today

Collect, review, manage and action all your data in ONE platform.

Collect

Capture data flexibly with any mix of EDC, eSource and HomeVisit

Handle third party data with ease: upload data from labs, multimedia and wearables

Attach multimedia and upload data instantly

Identify

Spot trends over time or by assessment with immediate data visualizations

Identify outliers in one view or one click through fully actionable, interactive insights

See site performance side by side

Track subject progress

Act

Track, review and clean all clinical trial data instantly

Increase collaboration amongst your study team through live query management

Save time through live, real-time coding

Identify missing or unexpected records and easily reconcile data

Manage

See, manage and action all your data, 24/7, with no downtime

Access full audit trail for all your data

Learn to navigate the platform in minutes with online training

Why choose encapsia?

Real-time

Collect, query, clean, visualize and analyze all your clinical data in **real time**, in one system with a single representation of the data,

Flexibility

Review **flexibly** and track and manage issues- all built in.

Choice

eSource, EDC, HomeVisit. **Capture data your way** and utilize multimedia for remote monitoring and novel study endpoints.

Availability

Powerful, configurable tools at your fingertips. Your data, where and when you want it.

Encapsia Insights.
Unrivalled oversight of data.

Impeccable client delivery and support, all the way

When working with encapsia, we ensure your trial is delivered by the most experienced project management supported by a team of technical consultants, all dedicated to support you in achieving your goals.

We offer:

- Account Management
- Database configuration
- Project Management
- Cloud hosting
- Telephone Helpdesk 24x7x365
- Minor & patch releases

Encapsia introduces Clinical Trials in 3D: *Decentralized, Data Science and Digital Transformation*

A revolutionary solution for decentralized clinical trials

Our industry is now, more than ever, ready to move to decentralized trials (DCT) and design hybrid protocols that support trial continuity and have a more patient-centric approach.

*Now is the time you need
a modern DCT platform:
powerful, flexible and
innovative*

Most sponsors are struggling to implement DCT and an innovative, modern technology platform that enables more efficient and future-ready trial processes can address the challenges you face.

The unique architecture of encapsia brings the technology to the data and provides an agile, revolutionary way to support decentralized clinical trials.

Step forward with encapsia and let us demonstrate how choosing the right technology can transform your trials of tomorrow:

- Conduct a trial visit at a patient's home, avoiding the need for patients to travel to site
- Easy to use eSource, accessible from anywhere in the world. Data is saved in real time in the cloud and can be captured even offline
- Smooth patient interaction: Sites can request drug dispensation, perform drug accountability, or randomize directly from the encapsia
- Less monitoring: no transcription of data with DDC, no SDV, hence reduced site visits
- Instant data quality offered by complex validation checks on entry
- Live data and industry leading visualizations offer unrivalled trial oversight
- Adaptability and easy adoption: eSource and EDC are supported within the same study allowing clinical teams the flexibility to manage site preferences or capabilities as needed
- Rapid data ingest and integration, with minimal intervention: third party data, labs, ePRO or data from wearables can be easily uploaded by the user
- Encapsia database is available 24/7, with no downtime for mid-study design changes or maintenance
- Easy and straightforward integration with other any of your existing systems

Evolve from data management to data science

With encapsia, you can transform your data management teams and empower them to be more efficient.

They can:

- ✓ Provide remote monitoring of trial data, in real-time, working in partnership with the CRA at site who is ensuring trial safety and efficacy
- ✓ Considerably reduce FTEs on cleaning the data and shift to analyzing and reviewing
- ✓ Gain greater domain knowledge and create a new paradigm in trial efficiency and effectiveness
- ✓ Benefit from improved data quality, greater patient safety and oversight

Drive your digital transformation forward

The radical shift of organizations from the traditional, staid clinical development process through digital transformation can now become a reality by bringing the right technology to your data.

Encapsia is built for purpose, leveraging modern concepts to revitalize clinical trials and giving users the experience of tech that they use in other aspects of their lives

Implementing a technology like encapsia into your workflows will not only improve efficiency, support speed to market, but also cascade further through your company, increasing the effectiveness of clinical teams and reducing costs.

Is designed to address the pain around remote collection, integration, and availability of disparate data

Offers powerful visualizations to provide greater oversight, down to the source data level, to allow immediate action and optimize trials

Leverages modern architecture to advance clinical trials, optimizing data workflows and removing the silos
